

Eagle + Infogix: Bringing Business Meaning to Your Investment Metadata

“Unify data artifacts (e.g. business terms, reports, applications, 3rd party feeds) from multiple sources to create a single trusted data governance portal, with informed investment decisions.”

ABOUT DATA3SIXTY™

Data3Sixty is a data management and governance platform that extracts maximum value for asset managers by quickly standing up a data governance program that bridges the business and technical worlds. This happens through a comprehensive data governance business glossary that aggregates data quality metrics and integrates technical metadata. The Eagle + Infogix solution creates client wins by fusing technical metadata with a business-friendly data governance interface.

Transform data chaos into actionable insights.

Business users don't “speak” metadata. But they need to understand its meaning to make the quickest, best-informed decisions possible.

Through the Eagle + Infogix solution, investment managers can readily answer such critical questions as:

- What does a data set mean?
- Where does the data come from?
- Is the data trustworthy?
- Does the data mean the same thing to everyone?
- How can I access it?
- Are there policies/licenses on the use of this data?
- Who owns the data?

The result is a data governance program that unlocks the business intelligence within your metadata, translates it into a common, understandable language, and makes it available—and actionable—to all business users.

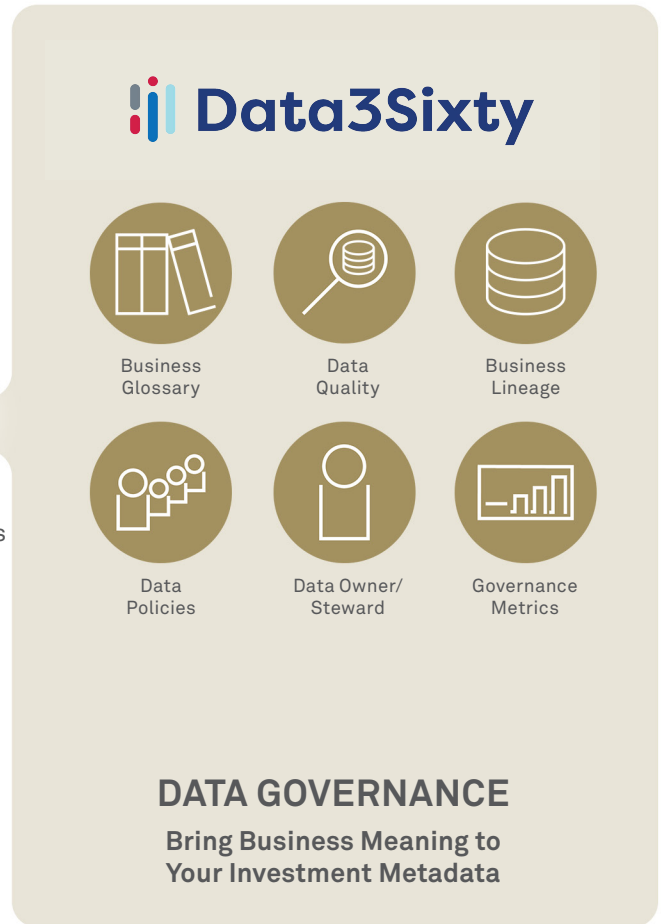

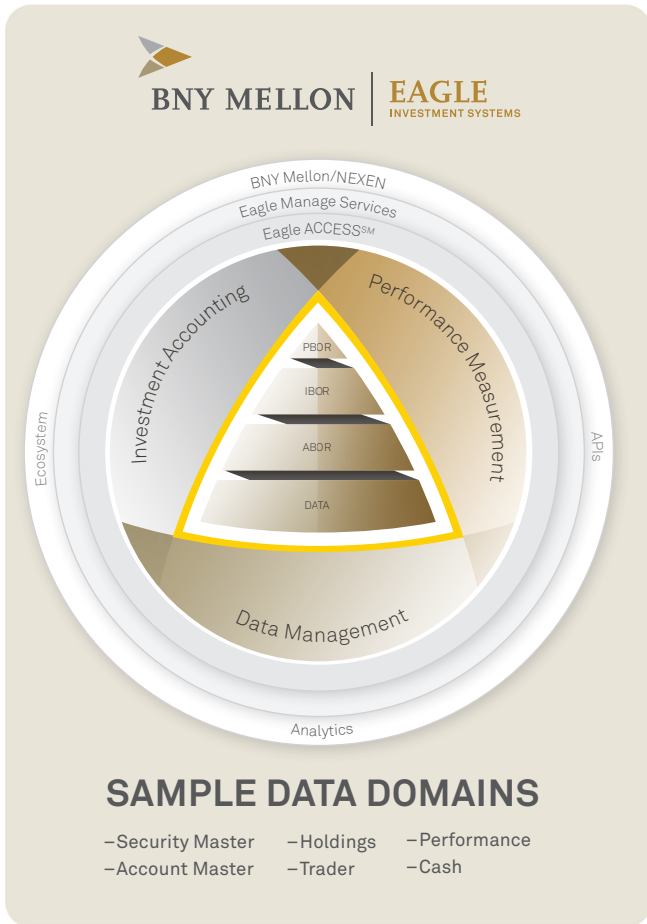

HOW EAGLE + INFOGIX DELIVER KNOWLEDGE, TRANSPARENCY, AND OVERSIGHT:

- *Knowledge:* The solution makes it easy to understand the relationships between data artifacts (such as Eagle business terms) and data models (such as investments).
- *Oversight:* The solution then creates governance protocols to the data artifacts by applying policies (such as external and internal rules and regulations).
- *Transparency:* The solution leverages Data3Sixty to automatically merge—fuse—Eagle metadata with the artifacts being governed.

SUPPORTING YOUR INVESTMENT IN EAGLE

Your firm benefits from the Eagle and Infogix alliance through continued collaboration and the investments that both firms make in simplifying the implementation, workflow, and ongoing support of the combined solution.

Eagle + Infogix Connectors: Simplified Data Governance for Investment Enterprises

Data3Sixty connectors provides a seamless capability to automatically extract the metadata from Eagle. With this metadata, Data3Sixty can quickly set up and maintain a data governance business glossary along with a host of other value-added capabilities including automated business lineage, business term impact analysis, and quantitative data quality metrics. The result is a solution that is quick to deploy and business friendly to bring business meaning to your investment metadata.
